

For Immediate Release:

Universal Manufacturing Corp. Launches New Quick-Quote Website

Zelienople, PA, May 29, 2007- Universal Manufacturing Corp., a premier scaffold manufacturer located in Zelienople, PA, announces the launch of their new website. The site incorporates a Quick-Quote function that provides quick, cost-effective scaffold estimates from a qualified Universal Distributor.

“This is a great feature not only for our customers, who will receive a quick response to their request, but for our scaffold distributors,” Says UMC Sales Manager, Mike Bredl. “We have integrated this feature into the site to provide qualified sales leads to our scaffold distributors throughout the country.”

A visitor can easily obtain a specific scaffold estimate by viewing several scaffold product lines and requesting a style and quantity desired. A Universal Representative will then email or call the visitor with the estimate.

“We are using Internet technology to help provide our distributors with the sales and marketing support needed to complement the quality, engineering and service that has built the Universal product,” says Bredl.

In addition to the Quick-Quote feature, Universal has incorporated an “overstock warehouse” where customers can find great deals on quality scaffolding, whether its overstocked or slightly used. You can visit the site at www.universalscaffold.com.

Universal Manufacturing Corporation has been pioneering the highest quality, steel scaffolding shoring and custom fabricated access equipment for more than 80 years. Located in Zelienople, Pennsylvania, Universal manufactures frame, shoring, system, tube & clamp and custom scaffolding for the light, medium and large industrial construction industries.
